

1 Unlace

We recommend first watching our installation video. You can find it at anleitung.zubits.de

Take your shoes and unlace the top three eyelet rows (holes) on both sides.

2 Relace

Relace your laces through the **Zubits**® on both sides.

Lace "under and up" through the **Zubits** and lace "over and down" through the shoe eyelets.

3 Step in

Split the **Zubits** by twisting apart. Put on socks you would normally wear and insert your foot. Stand up, then close the **Zubits** again. If you can't pull them closed then loosen the laces more.

4 Find securing clips

Clips: Find and use the included clips.

OR

Knot: You could tie a knot instead of using a clip. Clips are more adjustable.

5 Adjust fit

Pull shoelace through one side of the clip then slide the clip down to the shoe. (you can adjust the fit by pulling the clip tighter or looser.)

6 Secure

When fit is right, pull lace through second hole of clip to secure.

For most secure hold (or thin laces) wrap laces around the middle of the clip.

7 Cut or Tuck

Once the fit is correct, the shoelace ends can be cut off. Or tuck them inside shoes toward the toes for a day to test before cutting (or weave the laces through the other eyelet holes). -- When you cut, leave a couple centimeters extra in case you wish to re-adjust the fit later. See our "Tips & Tricks" page for more kid & adult solutions.

Best practices for use:

Twist to open

The easiest way to separate Zubits is to twist them before pulling them apart.

Removing shoes

When popping your foot out of shoes, don't try to squeeze out. Instead, step on your heel and lift your foot up and forward to split the Zubits apart. Then remove foot.

Frayed lace ends

If your lace ends won't go through the holes, tightly wrap the end with tape.

Tongue loop

Consider cutting out the loop on the center of the shoe tongue if it is pushing on the bottom of the Zubits causing them to open.

Remove debris

If debris or magnetic rock particles get between the Zubits, remove quickly so dents and scratches do not form.

Readjusting

You can always re-adjust your laces tighter or looser. If you do, try not to pull the laces out of the anchor holes because it is harder to put them back in.
